

# Let's talk about your water fitters

## did you know?

A single use water filter contains as much plastic as

**56** water bottles

It can also take up to

**1000 Years**

to biodegrade

**300 million**

tons of plastic items are produced each year

**91%**

of all plastic is NOT recycled

Time for change

# Reduce your plastic waste

LOOK BEYOND THE COFFEE CUP FOR HIDDEN WASTE REDUCTIONS AND SIGNIFICANT SAVINGS

# Switch

To

## iXWATER™

ECO-FRIENDLY WATER FILTER

On a typical annual exchange programme save equivalent of 104 coffee cups per year by switching iX Water Filter.

If you have 250 single-use water filters across your estate – switching from single-use water filters would make an equivalent saving of 27,000 water bottles per year.

# Why

Replace the whole filter?

When you can replace the resin insert only?

Replace.

Return.

Recycle.

Reduce.

As well as the environmental benefits - the cost savings are too big to be ignored...

# Save £££'s

Every time you replace the insert only rather than the whole filter- you save. The more filters you use - the greater the savings.

iX Filters have Insert Filter Technology. This allows you to replace the insert rather than the entire filter meaning iX filters are...

up to

# 60%

more cost effective

iX Filters for every type of application all with recyclable, replaceable media inserts

## Suitable for...

Coffee machines, Ice machines, Water coolers, Water boilers, Steam ovens and more

# Save money, Save the Planet

## What's stopping you?

We will even give you compatible heads if your current filter heads need changing. We can arrange site surveys and organise everything you need to start saving.
